Network Maintenance and Monitor

MCN is available to you to troubleshoot, maintain and inform you on the status of your current network and possible expansions. Everything from new security implementation, to complete redesign. These services are available on a per-call basis, or in the form of a service contract. Typical contracts involve: regular network checking, adding and removing of IP's, subnet maintenance, domain setup and maintenance, troubleshooting and resolving of problems on the network, troubleshooting of related hardware attached to the network, setup and changes to security policies, adding and removing of users, or the implementation of filtering and anti-spam solutions.

Intelligence for your data network.

MCN runs a powerful monitoring system, highly effective in minimizing network down time. Whether power outage, device failure, or deliberate tampering, MCN will alert you to the breach.

You can easily review your network status and activity reports by simply logging in to our monitoring system. Quickly assess the status and activity, in and out, of specific servers, switches and terminals on your network; any time of the day or night, from anywhere with internet access.

Be in charge of your data security. See for yourself when service has been interrupted and take control of getting back online with MCN.

MCN is a full service network and telecommunications company that is capable of handling all of your corporate telecommunication needs. When an emergency arises our response crews are ready to roll out on the shortest call out time in the industry twenty four hours a day seven days a week three hundred and sixty five days of the year. Based out of Saskatoon, Saskatchewan MCN is there to provide the best service in all locations across Western Canada.
