Trenching and Directional Drilling

MCN offers HDD, and as a result, there is little disruption of community traffic and very little impact on existing underground lines and services. HDD technology is used to install piping under roadways, railroads, rivers, obstacles, or established communities. MCN uses equipment that minimizes surface damage and restoration requirements leaving satisfied customers behind when we are finished. The maximum that MCN currently carries for pull back is 40,000 lbs with a maximum distance of 305 meters. MCN is environmentally friendly, ensuring any area that we work in will be left in the manner it was before we started. MCN offers various drill sizes, up to 20 inches, with options to go larger if needed.

MCN's Hydro Vac is available for every client; saving the costs of having to get another company to come and do a job that we willingly provide with our services.

MCN currently has a pedestrian walk behind trencher that is 36 inches by 6 inches wide allowing for access to hard to get at places with a larger machine. MCN will currently trench up to a max of 6 feet deep and 8 inches wide to satisfy all of your trenching needs.

MCN is a full service network and telecommunications company that is capable of handling all of your corporate telecommunication needs. When an emergency arises our response crews are ready to roll out on the shortest call out time in the industry twenty four hours a day seven days a week three hundred and sixty five days of the year. Based out of Saskatoon, Saskatchewan MCN is there to provide the best service in all locations across Western Canada.
